Full-time Research Assistant & Lab Manager

(PI: Alexander Todorov) 📍 Princeton University

June 2020 | January 2017

- Using psychophysical, neuroimaging, and general experimental methods in the lab and online, investigating how people evaluate their environments and how these evaluations shape perceptions, decisions, and interactions.
- Worked on several projects exploring (among other things):
  - how the distribution of facial features in an environment may bias people's evaluations of others;
  - how people integrate physical appearance and individualizing information in their impressions of others;
  - how people are able to associate affective information with faces and its limitations;
  - how people's mental images of a prototypical group member differ depending upon the label used to describe said group (e.g., labeling immigrants as "illegal" vs. "legal");
  - data-driven models of social perception, and the relative contributions of consensus and consistency in decision making.

Graduate Student Researcher

(PI: Wayne Chan) 📍 Rutgers University, Camden

September 2016 | September 2014

- Studied the effect of observer personality in person perception and bias using survey-based methods.
- Worked on projects exploring:
  - how people use stereotypes to judge strangers' personality from minimal external information;
  - how personality predicts the degree people ascribe humanity to the elderly and people with mental illnesses;

Volunteer Undergraduate Research Assistant

(PI: Wayne Chan) 📍 Rutgers University, Camden

May 2014 | January 2014

- Studied the effect of observer personality in person perception and bias using survey-based methods.
- Worked on project exploring:
  - how prejudice towards various across various age groups and how it may influence attraction;

Volunteer Undergraduate Research Assistant

(PI: Christopher Nave) 📍 Rutgers University, Camden

May 2013 | Janaury 2012

- Using behavioral coding using the Riverside Behavioral Q-set, studied the impact and stability of personality over the lifespan and its impact on behaviors.
- Worked on projects exploring:
  - how childhood personality impacts health behaviors and cognition several decades later;
  - how gay and lesbian couples provide social support and regulate their partners' health behaviors;
